#### DASHBOARD MOUNTED RECORDER

The R-XLM unit recorder with full control of user parameters direct from the three front panel mounted keys, via a user friendly menu facility.

The unit now allows the user alter user parameters on a regular or semi-regular basis similar to Storm's larger units.

#### The R-XLM unit supports:

1- 4 temperature sensor inputs, 1 door and 1 defrost input and an integral 24 column printer, and on board display facility in a radio slot format .

The unit has RS232 data download capability that allows data transfer between the recorders and a PC Or Laptop.

The unit is stand-alone and designed to furnish vehicles with a low cost, effective solution towards meeting the stringent requirements of EEC food regulations.

The R-XLM recorder prints out the temperature and event conditions on demand in :

**Delivery ticket, Journey ticket, Print All & "Print back from" format**, thereby providing the necessary evidence of the condition of the stored perishables within the cold compartment with time.

The print select buttons allow the recorder to print out the condition of each sensor in the above formats and the display shows real time information of the pertinent temperature parameters.

**All Storm recorders are supported by a full 2 year factory warranty**
